atmail™ cloud

Providing trusted, hosted email solutions

IF YOU'RE LOOKING FOR A TRUSTED HOSTING PARTNER TO MOVE YOUR DATA TO THE CLOUD AND HELP YOU SAVE MONEY ON INFRASTRUCTURE AND MAINTENANCE COSTS, YOU'RE IN THE RIGHT PLACE.

We can help you reduce your costs, monetise your email platform and transition quickly. With 20+ years of email expertise, you can trust us to move your email data to the cloud and host it for you, so you'll never again have to worry about in-house server costs, maintenance, downtime, virus protection, spam management or knowledge gaps in your technical support team.

ATMAIL CLOUD

atmail cloud combines the innovation of atmail's device-responsive, intuitive webmail interface, with the reliability of atmail's mail server and hosted environment. Choose dedicated or shared cloud, US or EU data centres. We also offer fully geo-redundant storage (GRS), as well as multi-AZ environments.

Leverage our best of breed technologies, specialist expertise and proven 99.99% uptime, to deliver a modern, fast and enjoyable email experience.

ATMAIL CLOUD

Features	Advantages	Benefits
White labelled	Easily update your logo and colour	Keep your brand top-of-mind
Modern interface	An attractive and intuitive design	An improved overall user experience
Responsive UI	Access accounts anytime, on any device	Seamless, on-demand user experience
Multiple accounts	Enable Gmail, Outlook, Yahoo! or other IMAP accounts in one place	Keep users loyal to your experience
Live updating and synchronisation	All elements updated and synced in real time	Users are not frustrated by sync delays
One-click archiving	Send emails to the archive quickly	Quickly achieve 'inbox zero'
Human translation for multiple language support	Less language errors by automated bots	A logical flow that makes sense to humans
Lazy loading	Emails and contacts load on demand as you scroll	Fast and responsive load time
Fully documented and open admin API	Easily integrate with other business systems to provision and monetise users and domains	Save money on integration costs with other business systems
Fully featured admin UI	All aspects of the configuration and API in one place	Simple to administer
Customisable role-based access control (RBAC) model	Create admin roles and permissions in the admin UI	You have control over who can do what and when
JMAP Proxy	Provides aggregate data from many different services and protocols in a consistent and clearly defined API	Helps us to scale our mail client as you scale
Developed on open protocols	Compatible with any IMAP, POP or DAV-based third party application	End users can use the apps they prefer
