atmail™ mail server

Supporting atmail's next generation email solutions

IF YOU'RE LOOKING FOR A RELIABLE RFC-BASED MAIL SERVER WITH AN AUTOMATION ENGINE, BUILT ON MODERN ARCHITECTURE, YOU'RE IN THE RIGHT PLACE.

Designed to complement atmail suite, the **atmail mail server** is the perfect back end environment to support atmail's next generation email solutions.

ATMAIL MAIL SERVER

The **atmail mail server** leverages an automation engine and fully featured admin UI to increase the ease and simplicity of both the deployment and the configuration of POP3, IMAP, SMTP and ManageSieve.

It also allows for incredibly easy management of users, settings, groups, domains, aliases and domain branding.

Role-based access control (RBAC) enables you to customise roles and permissions, so you have control over who can do what and when.

Highlights

- Branding per domain
- Private and secure
- RBAC (Role-based access control)
- Level 1 support functions
- Enhanced logging
- Auto-configuration tool for third party emails
- Automation engine
- Fully featured and user-friendly admin UI
- Structurally clear and simple playbooks
- All interaction over Secure Shell (SSH)
- Easy package manager installation
- Manage advertising display within different ad zones per domain
- Create and manage Class of Service profiles per domain
- Modular and highly scalable
- API configuration options
- Highly customisable
