at·mail™ suite

Leading the next generation of fast, modern and intuitive email

IF YOU'RE LOOKING TO MAINTAIN CONTROL OF YOUR DATA IN-HOUSE, BUT STILL WANT TO SAVE MONEY AND MODERNISE YOUR TECH STACK, YOU'RE IN THE RIGHT PLACE.

atmail suite is perfect for on-premises installations where you have your own infrastructure and you only want to pay for the services and support you need to complement your internal team.

Available as a stand-alone product to be deployed on existing email infrastructure or as a complement to atmail mail server for a full turnkey solution.

ATMAIL SUITE

atmail suite comprises version 8 of our webmail interface and a JMAP Proxy API server. The JMAP Proxy interfaces to existing IMAP, SMTP and DAV services provided by your existing infrastructure.

The device-responsive, intuitive UI has been developed to the latest standards in user-experience design and browser technology.

This pairing of modern architectures and design technologies results in an incredibly intuitive and fast email experience.
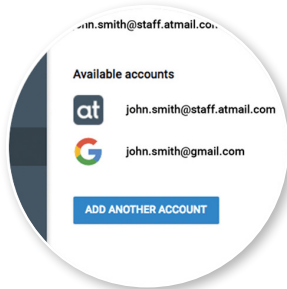

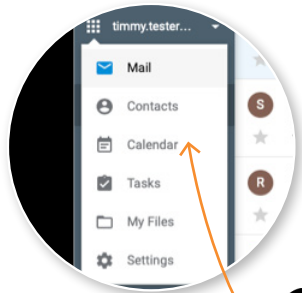

Highlights

- White labelled for your brand
- Modern, user-friendly design
- Advertising supported (optional)
- Class of Service
- Fast communication to back end services
- Cost-efficient with a low resource footprint
- Live updating and synchronisation
- Fully featured and device-responsive UI

- Extensive JMAP API configuration options
- Documented and open admin API
- Integrates with existing systems
- Modular and highly scalable
- Supports lazy loading
- Private and secure
- Analytics tracking

ATMAIL SUITE

Features	Advantages	Benefits
White labelled	Easily update your logo and colour	Keep your brand top-of-mind
Modern interface	An attractive and intuitive design	An improved overall user experience
Device-responsive UI	Access accounts anytime, on any device	Seamless, on-demand user experience
Multiple accounts	Enable Gmail, Outlook, Yahoo! or other IMAP accounts in one place	Keep users loyal to your experience
Live updating and synchronisation	All elements updated and synced in real time, across multiple user sessions	Users are not frustrated by sync delays
One-click archiving	Send emails to the archive quickly	Quickly achieve 'inbox zero'
Human translation for multiple language support	Less language errors by automated bots	A logical, native experience that makes sense to humans
Lazy loading (continuous scroll)	Emails and contacts load on demand as you scroll	Fast and responsive load time, with no pagination message in your email and contacts lists
Fully documented and open admin API	Easily integrate with other business systems to provision and monetise users and domains	Save money on integration costs with other business systems
Fully featured admin UI	All aspects of the configuration and API in one place	Simple to administer
JMAP Proxy	Provides aggregate data from many different services and protocols in a consistent and clearly defined API	Helps us to scale our mail client as you scale
Developed on open protocols	Compatible with any IMAP, POP, SMTP, or DAV-based third party application	End users can leverage their existing infrastructure and use the apps they prefer
Componetised development (React)	Easier to test and improve specific components	An agile system that supports all modern browsers and which we can adapt quickly
Highly performant compiled binary for server-side components (Golang)	No interpreted code and a lower resource footprint	Increased speed and decreased costs
Analytics tracking	Track when, where, how and on what device a user interacts with your system	Learn how to best serve users (and best lower your costs based on usage patterns)

ATMAIL SUITE: Webmail interface

**Fully featured;** email, contacts, shared calendars, tasks and files for desktop, tablet and mobile
